

OpenProject API URLs

These I found were the best way to find ID's for things like users/work_projects/projects etc and just useful information.

<https://docs.openproject.org/api/work-packages/>

List all WP ID's:

```
/api/v3/work_packages
```

Find Project ID's:

```
/api/v3/projects
```

Find User Info:

```
/api/v3/users/{username}
```
