

Mount NFS Shares via Fstab - Ubuntu Server 14.04

This is a one line example to mount NFS shares from new Ubuntu Server.

Replace:

```
sudo apt-get install -y nfs-common
```

```
sudo mkdir /mnt/disks  
sudo chmod 777 /mnt/disks  
sudo sh -c 'echo " /mnt/disks nfs auto 0 0" >> /etc/fstab'  
sudo mount -a
```
