Tweak VLC for use with Kodi - Auto Full-screen - Auto Exit - Network Cache

Ok so I have it set up where VLC starts automatically Full-Screen and then when it gets to the end of the clip, it Automatically exits, which then brings you back to Kodi! Also you can mess with Network Cache if you need to. If you get error messages but everything works fine, check out the Unimportant setting regard unimportant error messages.

Search	Playlist
Only show current	General playlist behaviour
✓ □ Advanced	☐ Play files randomly forever
GNU TLS	
Logger	Repeat all
Network Sync	Repeat current item
